Junior Java Developer

Ledelsea – Managed it Enterprise solutions company

12800 Whitewater Drive, ST 40 Minnetonka, 55343

Dear Company:

I am applying for the Junior Java Developer role, which will allow me to develop, test and maintain java-based programs, while collaborating with senior developers to learn even more. I found out about this job through Lake Superior College's Handshake partnership program. The skills that I have to offer would be 2 years in the computer and web programming field at Lake Superior College in which I learned how to use java. I am the best fit for this position because I have a strong passion for learning new things and would love to brighten my horizons by continuing to learn about different programming languages and contributing to the success of the company. because I have a strong passion for learning new things and would love to brighten my horizons when it comes to different programming languages.

Through coursework and hands-on projects, I have built a solid understanding of various programming languages. My two semesters of game development courses provided extensive exposure to C#, while my Java coursework helped me grasp object-oriented programming concepts effectively. Given my ability to learn and apply new languages, I am confident that I can quickly refine my Java skills and contribute meaningfully to your development team.

I am excited about this opportunity and believe my unique qualifications make me a strong fit for the position. I would welcome the chance to learn, listen, and leverage my skills to contribute to the team. Thank you again for your time and consideration.

Sincerely,

Landin Jones
